## Hot Air Heat Tunnel

### For Heat-Shrink Sleeves & Neck Bands

**A great asset for any production line!**

Our Hot Air Heat Tunnel for Heat-Shrink Sleeves and Neck Bands is essential for ensuring that packaging is done efficiently and effectively, especially in industries like **pharmaceuticals** and **food/beverage**.

#### Key Features:

- ✓ **High-Quality Construction:** Made from **stainless steel** ensuring durability and resistance to rust.
- ✓ **Versatile Design:** Suitable for various applications, including:
  - Shrinkable film wrapping
  - Shrinkable neck bands
  - Body sleeves around containers
- ✓ **Efficient Heating:**
  - Equipped with **four Hapco Bak hot air blowers** with **360° adjustable nozzles** for optimal heat distribution.
  - **Double wall heating chamber** with tight-seal brush bristles and a silicone-coated fiberglass curtain for consistent shrink rates.
- ✓ **Temperature Control:** Capable of regulating temperatures between **0° and 392° F**, allowing for flexibility based on the product requirements.

#### Benefits:

- **Consistent Results:** The design ensures an even shrink rate, which is crucial for maintaining product integrity.
- **Safety:** The double wall construction prevents overheating of the exterior surface, enhancing safety during operation.
- **Compatibility:** Works seamlessly with a compatible conveyor system, ensuring smooth operation.

**Cleveland Equipment**
