

CE-AVC

Chamber Vacuum Sealer

Chamber Size (in)	22x22x4
Seal Length (in)	20
Seal width (in)	1/4
Vacuum Flow (CFM)	18
Max Vacuum Pressure (inHg)	28.5
Air Requirements (CFM)	18
Amps @120 Volts A.C.	8
Unit Size (in)	29L X 24W X 12H
Unit Weight (lbs)	92
Max Temperature	500F
Ship Weight (lbs)	108
Ship Dims (in)	35 x 31 x 17

(Metallic base not included)

The CE-AVC provides a versatile vacuum sealing solution for any general application packaging program. Hand-assembled using top-grade materials and components, this Chamber Vacuum Sealer is the ideal solution for protecting your valuable items from oxygen, moisture, and static charge.

The CE-AVC vacuum sealer is powered by a compressed air-driven vacuum pump, eliminating any concern regarding noise, vibration, magnetic fields, or heat generation. Unlike electromechanically driven vacuum sealers. Clean room compatible, the CE-AVC vacuum sealer is the ideal choice for medical and electronic device manufacturers including tray, tape and reeled products; food industry retailers; and pharmaceutical and aerospace corporations. Precision components guide the CE-AVC's industry leading seal speed and ensure clean, wrinkle-free seals without any bag distortion.
