Available in 5 popular sizes!

Max Seal Length	20, 25, 30, 35, 50
Power Supply	8, 9, 13, 15, 15 Amps
Seal Width	¼"

CE-AVP-50

The AVP series was designed for heavy-duty applications. A one-tap steel-encased foot switch provides hands-free operation.

The CE-AVP Series' side-mounted heat and cool timers, fitted to a powder coated steel chassis, regulate seal parameters that are critical to obtaining airtight and watertight seals. The CE-AVP will not fire an impulse until the upper and lower jaw completely meet, further ensuring operator safety and uncompromised seal integrity. The pressure bar is powder-coated aluminum. Made of professional grade components, the AVP is lightweight enough (29 lbs.) to be moved effortlessly in your facility.
