

CAVS- Self Contained Retractable Nozzle Vacuum Sealer

Seal Length (in)	20, 30
Seal width (in)	1/4
Vacuum Flow (CFM)	3
Max Vacuum Pressure (inHg)	27v
Amps @120 Volts A.C.	10, 15
Max Temperature**	500F
Unit Size (in)*	28L x 10W X 7H

The CAVS is defined by its plug-and-play retractable nozzle vacuum sealing functionality. At the push of a foot pedal the CAVS draws a vacuum around your products; its automated stainless-steel nozzle then subsequently retracts before its 1/4" wide-sealing element delivers a leak proof seal to any kind and thickness of flexible bags including clear, foil (Mylar), mil spec and ESD bags. In a matter of seconds your components are sealed and protected. Clean room compatible with precision components the CAVS leads the industry in seal speed while delivering clean wrinkle-free seals without any bag distortion.

The CAVS series is perfect for food, pharmaceutical, medical, electronics, clean room, and any general applications where moisture and oxygen are a threat to your product. The CAVS' 1/4" wide-sealing elements deliver a leak proof seal using any kind and thickness of flexible bags including clear, foil (Mylar), mil spec and ESD bags.
