

CE-TRA-12FM

C-Frame 12" Long Gap

Transfer Bottomless Conveyor

The **CE-TRA-12FM** Gap Transfer Conveyor is designed to smoothly transfer filled or empty containers between conveyors by securely gripping their sides, preventing tipping during the transition. It is ideal for bottom coding, label inspection, de-pucking, and precise container spacing.

With independently adjustable, tool-less gripper belts, it accommodates containers up to 8" in diameter and 13" in height. Its compact C-frame design enables seamless integration over existing conveyor lines, making it ideal for space-constrained production areas.

The unit features variable speed control and supports a wide range of packaging types, including bottles, boxes, and flexible pouches.

MAIN FEATURES

- Manufactured in the USA
- 100% UL-certified components
- Tilting head design accommodates tapered bottles
- Height-adjustable
- Emergency stop (E-stop) push button
- Variable speed operation up to 80 ft/min
- Built-in pinch point protection for safety
- Ratchet casters with leveling pads.

TECHNICAL DATA

- AC Brother gearmotor
- Teco VFD
- Electrical requirements:
115 V / 1 PH / 60 Hz / 5 Amps
- Belt width adjusts to: 0-8"
- Max container height: 13"
- Belt size: 12" L x 1" H
- Floor to belt height: Minimum:26"
Maximum: 44"

OPTIONAL FEATURES

- Print head bracket
- Washdown duty motor
