

CE-225

Mesh Conveyor Heat Tunnel

Speed: 0-10 m/min

Tunnel Size: 800x400x200 mm
31.5 x 15.75 x 7.9 in.

Load: 5Kg (11 lbs)

The CE-225 Mesh Conveyor Heat Tunnel Machine has the advantage of high heating efficiency, accurate temperature control and stable performances.

The CE-225 Mesh Conveyor [Heat Tunnel](#) is a popular and economical packaging method in the packing industry. It is an economical machine for simple packing and aesthetically pleasing appearance. The product is wrapped with the shrink film and then shrunk and molded to product by heat. The package conforms to the shape of the product and is transparent to show product clearly. The shrink film helps ensure product is protected from moisture, pollution, and scratching or marring.
