- Air Supply 10-15 CFM @90 PSI

The PCB 6000 is a pinch bag sealer that uses hot air to activate a pre-glued flap on multi-walled paper bags that is rolled over and pressed closed. The PBC 6000 is used on semi-automated or fully automated bag closing lines to seal 18-110 lb. flat or gusseted paper bags. Able to handle bags 12"-20" long and up to 56" wide makes the PCB 6000 is perfect for human and pet foods, bakery mixes, dry chemicals, fertilizers, pesticides, and similar products.

Options:

- 17" extended infeed for automated applications
- Reverse fold-rear direction
- Left to right bag feed
- Bag coder contact front print
- Motorized height adjustment lift
- Special Steel-It paint
- [NEMA-4](#) washdown electrics
