

Hand Impulse Heat Sealers

Hand Operated Impulse Heat Sealers are ideal for any application requiring an air tight seal. The purpose of our impulse sealers are to insure a water tight and air tight seal for effective autoclaving and sterilization procedures. Great for use with: polyethylene, pliofilm, P.V.A., polyurethane, Kel-F, tivac, Polyvinylchloride, polyflex, saran, polypropylene, mylar, nylor.

These machines are made of a solid die cast construction that meets FDA production standards. The compact lightweight design make these impulse sealers easy to use and very effective. They include a visual heating display, variable temperatures and instant warm up allowing for a strong water tight seal.
