Semi-Automatic Hot Code Printer great from printing lot numbers, expiration dates, and other info on to plastic bags and other packaging material. Brand new, in the original box with instructions and tools. Hot code printer ideal for imprinting date codes, lot numbers, expiration dates, and other letters/numbers into plastic and paper bags. A great way to keep track of your products. This is a great little machine for adding traceability to your products by adding a lot number, date code, or other important information. Machine is sold complete with an assortment of numbers and letters to imprint on to your bags or packages. Additional numbers and letters if needed.

This machine is relatively easy to set-up and operate. Set your code in the print head and set the bag, pouch, or other material in place and press the foot pedal. Or you can set the machine to print at a timed interval. The print head is adjustable for various thicknesses of material. Two easy-to-adjust guides ensure the same position for each imprint. It adopts thermal printing ribbon to avoid oil contamination, which can keep the surrounding clean. The words printed are clear and enduring against wear and tear.
